

Regulatory Compliance and Investigations

New Jersey Assisted Living Regulatory Compliance and Investigations Attorneys

Einhorn Barbarito recognizes that healthcare facilities and providers are busy operating safe, profitable and efficient facilities and operations. Our clients let us assist them with being on the cutting edge of the constantly evolving regulatory landscape. Einhorn Barbarito assists facilities with being up to date on the latest regulations, both State and Federal.

When the State performs a survey or there are investigations or findings made against a facility and/or one of its licensed professionals, we assist in internal investigations and interface, if necessary, with the appropriate State or Federal agency. Einhorn Barbarito represents facilities and their administrators before the Office of Administrative Law when a hearing is necessary to appeal a decision that impacts the viability, profitability or operation of a facility.
